Background

At Robinson's murder trial, the prosecutor presented the jury with irrelevant and inadmissible serology evidence, and also, based on that evidence, falsely told the jury that Robinson's blood was absent from the butcher knife. That false premise – if believed – made Robinson look like a conniving or delusional liar. Evidently accepting that false premise as true, the jury convicted Robinson of first-degree murder, although the evidence supported, at the very worst, no verdict worse than second-degree murder. Robinson, a first offender, is serving a life sentence.

Due to the discovery this Court has granted, Robinson has been able to show that his blood was (and is), in fact, present on the butcher knife, and thus that his conviction was procured based on a false premise. Following up on this discovery, Robinson has asked for permission to review police files and take three critical depositions. That discovery could lead to
